**XTC01 BASE ASSEMBLY FOR STANDARD KEYBOARD
XT002 ADDITIONAL RISER WITH
XTM01 MOUSE PLATFORM (9" x 8")**
(shown here with the J757-A-H model Task Chair)

**XTC01 BASE ASSEMBLY WITH XTK001 EXTENDED
KEYBOARD PLATFORM (26" x 8")**
(shown here with the K2507-A-H Management Chair)

Extend the ergonomic comfort of your workstation, and end neck and shoulder tension with BodyBilt's exclusive X-Tension™ Arm accessories! The X-Tension™ Arm is a fully adjustable work surface that attaches directly to each BodyBilt chair. The various models and options shown here provide surfaces for a laptop, keyboard and mouse, writing, and even a court stenograph machine.

Even without the X-Tension™ Arm, each BodyBilt chair is equipped with an average of ten standard adjustable features. The X-Tension™ Arm adds even greater function, with at least eight additional adjustment features, putting an incredibly adjustable desktop right in your lap!

The X-Tension™ Arm option performs two significant functions for both the corporate setting and the home office. It frees up much needed desk space by moving the keyboard, mouse, or laptop off the work surface and onto the chair. Perhaps more important, it frees you from the confines of the desktop by moving your work closer to your body.

The adjustability of the X-Tension™ Arm, combined with BodyBilt's unique 10-Point Posture Control™ system, allows users to assume the most natural, stress-free posture possible while working, without the confines of fixed workstation height, width, and depth.

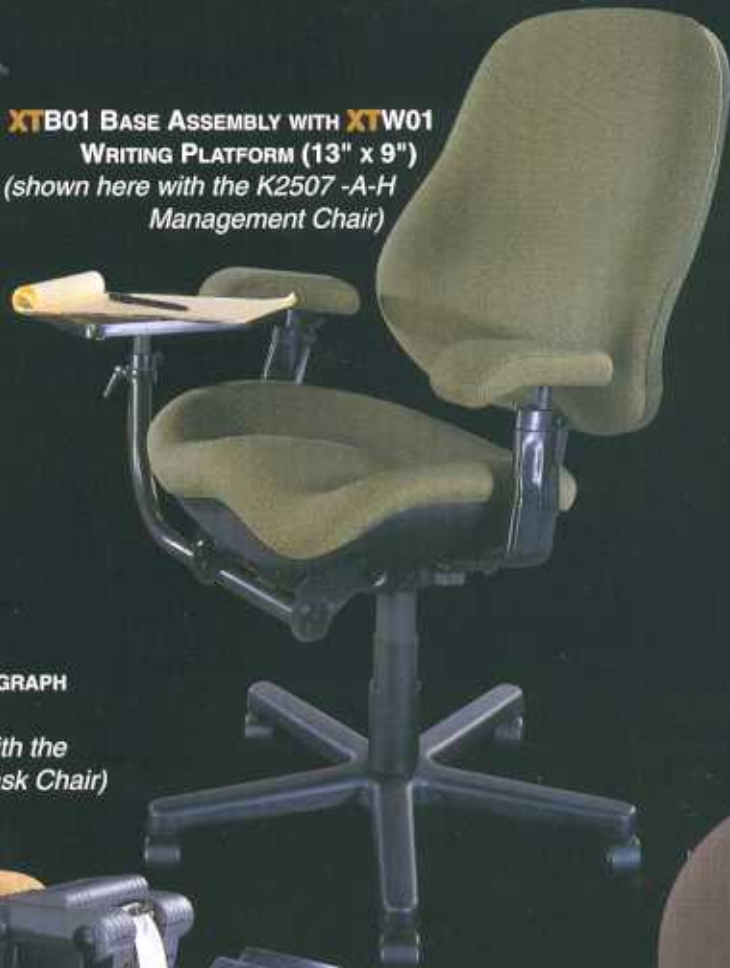

The BodyBilt X-Tension™ Arm provides ultimate adjustability, resulting in maximum comfort and productivity!

XTC01 BASE ASSEMBLY WITH I-BOOK PLATFORM
(shown here with model J3507-A-H Executive Chair)

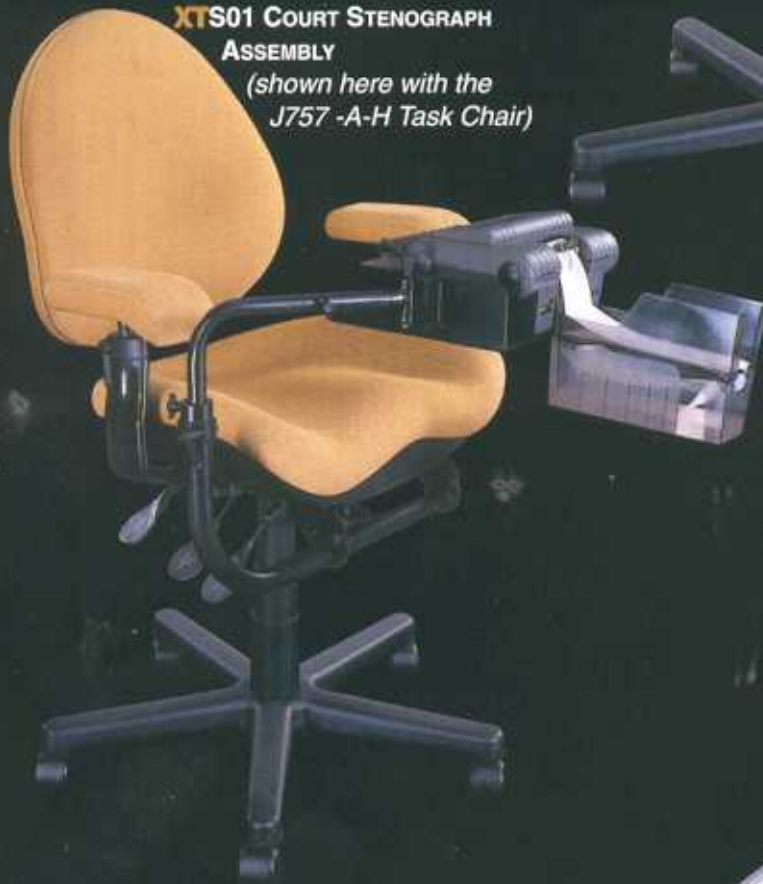

XTC01 BASE ASSEMBLY WITH STANDARD LAPTOP PLATFORM
(shown here with the K2507-A-H Management Chair)

**XTB01 BASE ASSEMBLY WITH XTW01
WRITING PLATFORM (13" x 9")**
*(shown here with the K2507 -A-H
Management Chair)*

**XTS01 COURT STENOGRAPH
ASSEMBLY**
*(shown here with the
J757 -A-H Task Chair)*

R001 SOL X-TENSION™
(shown here on J207-F1 Stool)

The Sol X-Tension™ supports an open leg position for people who use drafting-height stools. It allows the users to rest their legs in a more natural position, relieving compression on the back of the legs. It helps the user sit back on the seat to take advantage of BodyBilt's supportive seat design by providing a height-adjustable "floor" for their feet and legs, dispersing the body's weight more evenly, and facilitating blood flow to the lower legs.
